

SIMFLEX WASH CONTROL

Reasonable “ROCKET SCIENCE”
for your washing needs!

The SIMFLEX wash control makes it easy to operate your milking system.

A 6" High contrast touch screen displays all the input and output signals for the operator to see.

THE SIMFLEX wash control puts all of your wash parameters at the tip of your fingers.

An integrated Setup Wizard makes programming a snap. The optional sanitizer can be programmed to start when you want it.

The wash control allows you to use a 2 Jar setup, 3 Jar setup, or pumps for delivery of your chemicals

The SIMFLEX wash control has a programmable limit switch option that allows you to bypass this feature to get milking in the case of a broken limit switch. NO EMERGENCY calls for a broken wand! Simply bypass, and milk!

The SIMFLEX contains an alarm to prevent overflowing or a plugged water solenoid from going unchecked.
